Background:

New Consultancy and Relief Organization (NCRO) is a registered Non Governmental Organization (NGO) with the government of the Islamic Republic of Afghanistan. It was established under the name of Narcotic Control and Rehabilitation of Afghanistan in 1993; the name was changed in 2005 into National Consultancy and Relief

New Consultancy and Relief Organization

NCRO Annual Report 2019

Association. In 2012 the name of NGO changed to New Consultancy and Relief Organization. (NCRO) is involved in providing basic humanitarian services in the following sectors:

- In the field of health, NCRO organized hygiene awareness raising campaigns for women in a number of villages in Nangarhar **Province**
- In Agriculture sector, NCRO distributed Improved Wheat Seeds to farmers in different provinces; established fruit and non fruit nurseries; trained women on maintaining kitchen Garden;
- In livestock, NCRO distributed UNHCR donated cows, goats and poultries to returnees and IDPs, this in addition to creating fish ponds in certain suitable returnee focused areas
- In irrigation sector, NCRO constructed water intakes, canal rehabilitations, construction of siphons, kariz cleanings and protection walls
- In water supply, NCRO established pip schemes, dug potable water wells and provided hygiene education as a component to the aforementioned projects;
- In the infrastructure, NCRO constructed school buildings, clinics and resurfaced tertiary roads in a number of villages
- NCRO has been engaged in shelter construction program of UNHCR for the past 3 years and is still working in this field;
- In sanitation NCRO constructed latrines and improved waste water drainage systems and created garbage bins
- In capacity building NCRO provided income generation trainings for returnees and IDPs' families
- In consultancy NCRO provided need assessment of Returnee and IDP by implementation remote monitoring and women right advocacy project under UNHCR fund and referred a number of cases to UNHCR and other relevant agencies through UNHCR Jalalabad.
- In RE/EE NCRO has installed over 517 photovoltaic systems and constructed over 15 Micro Hydropower.

INTRODUCTION:

NCRO implemented the following projects in 2019;

New Consultancy and Relief Organization

NCRO Annual Report 2019

- 1) Food and livelihood inputs assistance to the conflict affected IDPs returned to their place of origin in Nangarhar and Kuner Provinces
- 2) WFP Assistance program
- 3) Shelter upgrading and winterization cash based assistance for IDPs and Host community in 12 Hard to reach districts of Laghman, Nangrhar, and Kunar province.
- 4) Improved food and nutrition security (Kitchen Garden, Poultry and animal feeding) in Mehterlam and Qarghaee districts of Laghman Province.
- 5) Drought response through ES, NFI and Winterization assistance in 3 IDPs' sites in Karukh, Guzara and Injil districts of Hirat Province..
- 6) Drought response through WASH assistance in Dawlatyar and Tolak two hard to reach districts of Ghor Province.
- 7) Afghanistan Joint Response Phase III

Details of Implemented Projects in 2019

1. PROJECT INFORMATION

Organization :	New Consultancy and Relief Organization
Allocation Type :	2019 1st Standard Allocation
Project Title :	Food and Livelihood inputs assistance to the conflict affected IDPs returned to their place of origin in Nangarhar and Kunar provinces.
Fund Code	AFG-19/3481/SA1/FSAC/NGO/13307
Cluster : FSAC	

Project Budget in US\$:	643,391.00	Planned project duration :	6 Months
Actual Start Date:	10/08/2019	Actual End Date:	09/02/2020
Project Summary :	<p>The proposed project provided assistance to returned IDPs in their place of origin Khogiani and Sherzad Districts of Nangarhar Province</p> <p>1: Ensure continued and regular access to food for the acute food insecure people across the country to needy people.</p> <p>2: Protect and rehabilitate livelihoods of vulnerable people at risk of hunger and malnutrition through appropriate response and linkages with development program.</p> <p>In May & June 2019 some of these IDPs returned back to their place of origin in Sherzad and Khugiani district.</p>		

New Consultancy and Relief Organization

NCRO Annual Report 2019

On 12 June, NCRO conducted a rapid assessment in Khugiani and Sherzad districts and identified 1800 families in need for immediate food and agricultural inputs assistance.

During the assessment it was found that the returnee IDP families had lost their assets, crops and livestock. They were in immediate need of food assistance and livelihood support in terms of agriculture inputs.

Under this project:

3: 800 affected families received agriculture training & US\$90/family through Hawalla for FSAC standard Agriculture inputs to start their livelihood and 400 families received US\$ 180/family for two months food assistance@ (90 USD/month x 2 = 180 USD) in Sherzad district.

4:400 affected families received agriculture training & 90 USD/family through Hawalla for FSAC standard Agriculture inputs to start their livelihood and 200 families received US\$ 180 for two months food assistance (FSAC Standard food basket of family @ (90 USD/month x 2 = 180 USD) in Khugiani district.

Chapadara district of Kunar province

1:In March 2019 due to conflict between Taliban and ISK, 5,257 families displaced from Chapara district of Kunar province to other parts of Kunar and Nangarhar province. (See Annex-VI UNOCHA conflict displacement report of Kunar province) Out of 5257 assessed families, 3,554 families have been selected and received assistance (Please see Annex-VII UNOCHA response matrix).

2:In May & June 2019 some of these IDPs returned back to their own villages in Chapadara district. On 11 June 2019, NCRO conducted a rapid need assessment of the returned IDPs in their place of origin (Please see NCRO Assessment reports Annex-IV and district governor letter Annex-III certifying the return of IDPs and their needs) and identified 1680 families in need of immediate assistance.

During the assessment, it was found that the returned conflict affected people had lost their assets, crops and livestock and are in need of food assistance and livelihood support (Agriculture inputs).

	<p>Under this project:</p> <p>3: 1200 returned families will receive agriculture training & 90 USD/family for FSAC standard Agriculture inputs to start their livelihood and 480 vulnerable returned families will receive 180 USD cash through Hawalla for food as two months food assistance @ (90 USD/month x 2 = 180 USD).</p>

2. PROJECT INFORMATION

Organization : New Consultancy and Relief Organization

Modalities (food,cash, capacity strengthening , technical and specialist Services) :	Asset creation Project - food		
Project Title :	WFP Assistance Program		
Fund Code	AF01-0392/2019/Jal/ CSP-ACL-F/NCRO		
Project Budget in US\$:	52,602.3 US\$	Planned project duration :	7 Months
Actual Start Date:	15/08/2019	Actual End Date:	14/02/2020

Achievements of the project

1. Constructed of 4010 m road, 6 culvert and 150 m protection wall for Gadoli village.
2. Constructed of 4300 m road, one culvert and 150 m protection wall for Gadogal village.
3. Constructed of 6000 m canal for Gadoli village.
4. created jobs for 641 labours in the community working in construction of roads and canal in target area mentioned.
5. Increased food production in the village.
6. Ensured food security by reducing vulnerability as well as to avoid coping mechanism in the target community
7. Preserved of sustainable livelihood in target community
8. It supported growth in their cultivating as they can get access easily to export their agriculture products.
9. Created road access between villages and district centre.
10. Distributed of food for most vulnerable and food insecure families.

11. Reference to gender mainstreaming and project nature, ensured women to be food secure, benefited from the project indirectly as well as could seek project benefit in term of sustainability of livelihood in the community

Labours working for construction of Gadogli Rood of Shigal under WFP Asset Creation program

4: PROJECT INFORMATION:

B.1. PROPOSED PROJECT TITLE	Improved food and nutrition security (Kitchen Garden, Poultry and Animal feeding) in Mehterlam and Qarghaee districts of Laghman Province
B.2. PROPOSED PROJECT LOCATION(S)	Mehterlam and Qarghaee districts, Laghman Province
B.3. PROPOSED PROJECT DURATION	12 months
B.4. PROPOSED PROJECT BUDGET (EUR)	72,453 Euro

SECTION C: Project activities – description, methods, and instruments

activity 1: Trained 100 women in Kitchen Gardening

100 vulnerable women were initially screened based on their willingness to be engaged in this type of livelihood activities. They trained in kitchen gardening for producing vegetables. They were already familiar with vegetables and trees production. They gave more technical training on new vegetable production

For more details and scoring of project participants Please see attached Annex - IV WFP targeting and vulnerability criteria.

Activity number	Description	Quantity	Cost/Unit	Total in euro
1.1	Distribution of vegetable seeds and compost fertilizer	100	39.9 Euro	3990
1.2	Distribution of Agricultural tool kits	100	20.1 Euro	2010
1.3	Training of participant in vegetable production, Hygiene and Nutrition	100	5.74 Euro	574
	Total	100	39.9 Euro	6574

Activity 2: Objective description / title: train 79 women in Poultry

They were found to be familiar in the poultry production but would need more technical training to improve on the Proper production technique, through proper feeding keeping improved varieties of egg layer hens with high yield. The feedback elicited overwhelming consensus and enthusiasm. A total of 79 most vulnerable women such as widows disable and families having more than 7 members finally selected in Qarghaee and Mehterlam district and participated in the program.

activity 3: Objective description / title: Training of 200 Men & 118 Women in animal feeding & feed production).

This part of the project will had 318 participants (200 men and 118 women). The participants selected according to the WFP vulnerability criteria by the participant selection committee (PSC). These participants divided into several groups. Each group would have 2 days training/week and 1 day group field work (mixing concentrated feed) for learning and they worked individually on their own farms for two days. Each participant received ingredients of animal feeds for producing concentrated feed for feeding animals.

NCRO project staff had regular field visits and the relevant trainers gave instructions to the participants The basic daily feeding requirement

OVERALL OBJECTIVE (IMPACT): Food and nutrition security situation in Mehterlam and Qarghaie districts of Laghman Province is improved.

Project purpose (Outcome)	Indicators:	
	Current	Target (goal)
<p>Outcome : Food and nutrition security of the 497 vulnerable families (IDPs, returnees and host communities) have improved in target districts.</p>	<p>According to IPC report in Laghman province 45% (227909 ind under minimal food security), 15% (75970) under stress, 30% (151939 ind) under crisis and 10% (50646) of people are under emergency food need Most of women headed families are in need of livelihood in rural villages of Laghman. Some half of the population including returnees and IDPs has no access to secure food and nutrition.</p>	<p>By the project end, at least 50% of targeted the HH's have improved food consumption scores as compared to baseline values. By the project end, 497 HH's show significant reduction in food coping strategies as compared to baseline values. By the project end, at least 50% of targeted HH's has increased months of adequate household food provisioning (MAHFP).</p>
Outputs/Results	Indicators:	
	Current	Target (goal)
<p>Output1: Vulnerable HH are able to maintain their kitchen gardening and use diversified food.</p>	<p>According to IPC report in Laghman province 45 % (227909 ind under minimal food security), 15% (75970) under stress, 30% (151939 ind) under crisis and 10% (50646)of people are under emergency food need</p>	<p>By the project end, at least 55% of targeted women (15-49 years old) have better nutritional diversity as measured by Minimum Dietary Diversity for Women (MDDW). By the project end, at least 70% of total targeted HH's continue to care for their kitchen gardens. By the project end, 90% of targeted HH's successfully established ON season kitchen gardening and 50% of targeted HH's establish off seasons kitchen gardening.</p>
<p>s Vulnerable women are able to open/extend</p>	<p>The national monthly income is 15000 Afs and the average HH income per month in Laghman</p>	<p>By the project end, 100% of targeted women make at least 30% contribution to the Household</p>

New Consultancy and Relief Organization

NCRO Annual Report 2019

<p>livelihood and contribute their household economy through poultry keeping.</p>	<p>province is 8000 Afs (94 Euro) 47% less than the national monthly income. The women headed families are in the lowest grade of income that cultural barriers don't allow them to participate in all type of livelihood.</p>	<p>economy (considering cash and saving income) By the project end, 90% of targeted women continue their poultry farming By the project end, 70% of targeted women know and apply learnt poultry farming techniques to their poultry farms.</p>
<p>Ouptut3:</p> <p>Most vulnerable livestock holders are able to have sufficient concentrated animal feed and contribute their household economy through livestock keeping</p>	<p>Over 20% of Laghman Population 101293 individuals are involved in livestock rearing.</p> <p>The livestock owners have various difficulties associated with livestock rearing like: low knowledge of livestock owner in animal feeding, lack of fodder, lack of pastures, livestock diseases, prevalence, time of vaccination, time of insemination, animal feeding, the basic daily feeding requirements and selection of the location for cow keeping.</p>	<p>By the project end, 70% of targeted project participants make at least 30% contribution to the household economy (considering cash and saving income) By the project end, 95% of targeted project participants continue their livestock rearing. By the project end, 90% of male and female targeted livestock holders know and apply learnt livestock rearing techniques and increase livestock production and improve dairy practice.</p>

5. PROJECT INFORMATION	
Organization :	New Consultancy and Relief Organization
Allocation Type :	2018 5th Reserve Allocation
Project Title :	Drought response through ES, NFI and Winterization assistance in 3 IDPs' sites in Karukh, Guzara and Injil districts of Herat Province.
Fund Code	AFG-18/3481/RA5/ESNFI/NGO/11278

OPS Details			
Cluster :		Project Budget in US\$:	315,264.64
Planned project duration :	6 Months	Priority:	
Planned Start Date :	01/12/2018	Planned End Date :	31/05/2019
Actual Start Date:	01/12/2018	Actual End Date:	31/05/2019

Project performance

With the project implementation we achieved the following activities:

Activities

Activity 1.1.1

The proposed project provided Assistance In Herat province as following:

1. Pohantoon IDPS site in Injil district:

A. 105 individual of 15 families(22 Men, 22 Women. 30 Boys and 31 Girls) received cash based assistance for ES/NFI cluster standard NFI package

B.105 individual of 15 families (22men , 22 women , 30 boys and 31 girls) received emergency shelter (tent) in kind assistance.

2.urdo bagh IDPS, site in Guzara district

A. 4151 individual of 539 fmailies (859 men , 863 women , 1204 boys and 1225 girls) received cash based assistance for ES/ NFI cluster standard NFI package.

B. 4151 individual of 539 families (859men , 863 women , 1204 boys and 1225 girls) received emergency shelter (tent) in kind assistance.

3. Rigeration IDPS, site in karukh district

A. 6230 individual of 890 fmailies (1290 men, 1296 women , 1806 boys and 1838 girls) received cash based assistance for ES/ NFI cluster standard winterization package.

B. 5593 individual of 799 fmailies (1158 men ,1163 women , 1622 boys and 1650 girls) received cash based assistance for ES/ NFI cluster standard winterization package.

c. 2247 individual of 321 families (465men , 467 women , 652 boys and 663 girls) received emergency shelter (tent) in kind assistance.

In general in both 3 IDPs sites of Herat over 22582 people received live saving assistance.

Standard Activity: Provision of ESNFI support to vulnerable IDP, returnee, conflict and natural-disaster affected households. NCRO will distribute emergency shelter (tents) for drought affected IDPs' families. Beneficiary verification and selection (Please see Annex-A NCRO project Beneficiary selection and assistance distribution criteria) to vulnerable IDPs (cash recipients for Winterization and NFI, Activity). Creating Beneficiary Selection Committee (BSC)

NCRO field staff will establish a Beneficiary Selection Committee (BSC) for effective coordination in each of the three district. This committee will be constituted of DoRR, representative, local authorities' representative, community elders, and NCRO field staff.

NCRO staff will have briefing meeting with BSC and will explain project activities, Target area of project, target beneficiaries, eligibility criteria for beneficiary selection, quantity and itemized explanation of assistance and amount of cash transfer of each activity. Distribution of token to eligible selected beneficiaries.

NCRO staff will distribute the token to selected beneficiaries in their displaced location. These tokens will show the identity of beneficiary, location of cash distribution center, Date and time of distribution, compliance officers' phone numbers and contact number of field assistants for farther instruction. also

this token will help distribution staff for well knowing the beneficiary.
NCRO will participate in all humanitarian response coordination meetings, cluster meetings at national and regional levels. Sharing of project MoU after signing and officially informing the Ministry of Economic and MoRR in Kabul and line departments in the province level and relevant districts government. NCRO will provide technical support to the beneficiaries. NCRO will report through Report Hup to OCHA and cluster

beneficiary received emergency shelter in Guzara district

beneficiaries received cash based assistance for ES/NFI cluster standard Winterization package in Injil

beneficiaries received cash based assistance for ES/NFI cluster standard NFI package in Guzara district of Hirat

beneficiaries received emergency shelter in Injil district

6. PROJECT INFORMATION

Requesting Organization :		New Consultancy and Relief Organization	
Allocation Type :		2018 2nd Standard Allocation	
Primary Cluster	Sub Cluster	Percentage	
WATER, SANITATION AND HYGIENE		100.00	
		100	
Project Title :		Drought response through WASH assistance in Dawlatyar and Tolak two hard to reach districts of Ghor Province.	
Allocation Type Category :			
OPS Details			
Project Code :		Fund Project Code :	AFG-18/3481/SA2/WASH/NGO/9756
Cluster :		Project Budget in US\$:	449,976.28
Planned project duration :	9 Months	Priority:	
Planned Start Date :	01/09/2018	Planned End Date :	31/03/2019
Actual Start Date:	01/09/2018	Actual End Date:	31/05/2019
Project Summary :	<p>The target area of project is Damarda village of Dawlatyar district and In Sari Poshta, Qali Fawad Sarasiab Gula Chushma, Hyderabad Takht Qala and Jurak villages of Tolak district in Ghor province.</p> <p>The main source of the residents income are agriculture and livestock. The residents of the village are from the poor clan of the society and struggle with problems on accessing to water and health facilities; Previously dug shallow wells but due to decrease of the water table most of the wells are dried. The residents use from an improved water source which is provided from the Hiray Rood river, the streams in the village contaminates with several garbage and dirt, the water is fully unsafe and prevalence of related disease is expected, the river water contaminates with mud four months of the year and when the remained months of the year is openly use by animals and people wash the cloths which makes</p>		

the water unsafe for drinking.

The findings obviously show that when the residents use from the water exposes them to several diseases as such diarrhea is most prevalence between the children, as the residents don't have access to health care centers, so this putted the families in a tough situation

The pipe scheme project will durably solve problem of availability, accessibility and utilization of safe potable water in a densely populated village as outlined below:

1. The people use unsaved river water for drinking and domestic use.
2. In previous years aid agencies dug shallow wells and bore wells, that most of them are dried due to current drought.
3. During the FGDs, the children complained that cannot attend to their schools because they need to bring water and it hampers their learning process because they are tired.
4. In winter season the water of river became muddy and people cannot use, they hardly doing manual filtering and not have access to water 24 hours for weeks people cannot take bath.
5. The children having skin problem because of using muddy water mostly in winter.
6. In summer season the animal using the same sure of water that human use.
7. For some of the families the distance of water (Unsafe water from River) is about 1100 to 1500 meter, which is 100% far from Sphere minimum humanitarian standards.
8. During the day, the men's are involve in farming and livestock activities and its duty of women and girls to pass far away to bring water during the way there is risk of protection and harms, there was harassment cases mostly for girls and women particularly late evenings.
9. During the visit the mission saw most of the mud and roofing works of shelters were incomplete due to lack of water while there is concern in upcoming freezing winter season.
10. Over 14553 droughts affected people are seriously in need of drinking water if there are no interventions for durable solution before winter, people will start displacement to center of Ghor and other provinces.

The current drought has affected more than 10 provinces in the western and southern regions of Afghanistan. Considering this natural disaster NCRO and ARAA decided to take part in response to some of needy people in Dowlatyar and Tolak districts of Ghor province.

The proposed project will provide Assistance under WASH as following

1. Construction of three deep wells and equipped with solar power water pump, reservoir and Pipe scheme to provide drinking water for 1050

--	---

Project performance

With the project implementation we achieved the following activities:

Activities

For the operation of water pump we had the following 3 sources for each well:

1. Direct solar panel: 3000 watts solar panels connected with AC water pump through a DC/AC converter. This system worked automatically every day from sunrise to sunset it would have capacity to fill 24000-36000 liter per day.
2. Solar panel with Batteries: 1000 watt solar panels charged the 8 batteries at day time to store the electricity every day from sunrise to sunset. The charged batteries will be used at poor weather hours and night times.
3. Generator: A small generator with capacity of 3-5 Kw will be used in poor weather days (cloudy or rainy days). This generator would operate based on need of community for water. The running cost of generator provided by Water committee

Having above 3 systems in each well enabled continuity of water pump operation in all weather condition. For each well solar panel, water pump, generator, one elevated reservoir, one operator room and 10-15 tap stands constructed. Hygiene promotion sessions for drought-affected communities and distribution of hygiene kits (only to displaced families that are living in complex conditions). Hygiene promotion training conducted in Dawlatyar and Tolak districts of Ghor province for 2000 non displaced drought affected people. Coordination with UNOCHA, HFU, UNICEF, IOM, UNHCR, FSAC, WASH Cluster, Protection Cluster, FAO, WFP, GBV sub cluster, MoEc/DoEc, DoWA, DoRR, Provincial and district authorities in West Region . Shaed of project MoU after signed and officially informed the Ministry of Economic and line departments (DRRD) in the province.

Community mobilization

. The objective and activities of project including target beneficiaries explained to the community. The community asked for their views, thoughts and contribution on the location for water points with easy access for all beneficiaries, women participated in the project, created water committee, Trained of water committee, care taker and mechanic for maintenance of water points from community etc. Formed Beneficiary Selection Committee (BSC).

This committee consisted of DRRD, District government representative, NCRO/ARAA, CDC or Malik . The responsibility of BSC was the selection of community whom are seriously in need of water, Location for

New Consultancy and Relief Organization

NCRO Annual Report 2019

well and reservoir in public area with a right elevation and easy accessible acceptable for all. Created water committee, Operator, Care taker and mechanic.

NCRO/ARAA created Water Committees (WC) from beneficiaries' base on election in the community level having 5-7 members from all users for each solar equipped well and pipe scheme. The WC had women members or men had direct link with the village women Shura.

The proposed project was aimed at providing WASH assistance to drought affected no displaced in Da Mardah hard to reach district Of Ghor province. All activities Of project designed based on eligible activities for drought response under CHF second Standard allocation of 2018 as following:

A - WASH:

Sol & WASH Cluster Objective •1.4: WASH related communicable diseases reduced among IDP, returnee, refugee and non-displaced conflict affected, women, men and children of all age through timely and adequate WASH assistance.

The proposed project provided Assistance under WASH for non displaced drought affected people as following:

A: Dawlatyar district:

1 : Constructed of three deep wells equipped with solar power water pump, 4000 W solar Panel, 8 Batteries.5 KW Generator, 12000 Liter elevated reservoir With total production of 36000 liter per day, 15 Tab stand and 1200-1500m Pipe scheme. Each well has the capacity to provide drinking water @ 15 liter per person per day for 2400 persons from 343 non displaced drought affected families in Da Mardah villag Of Dowlatyar district of Ghor province. In total three wells sufficient for providing drinking water to 1050 families 7350 individuals residence of Damardah village.

2. Training of 950 families in hygiene awareness rising. in Da Mardah villag of Dowlatyar district of Ghor province.

B: Tulak district:

1: Constructed of one deep wells equipped with solar power water pump, 4000 W solar Panel, 8 Batteries.5 Kw Genrator, 12000 Liter elevated reservoir with total production Of 36000 liter per day, 15 Tab stand and 1200-1500m Pipe Scheme. Each well has the capacity to provide drinking water @ 15 liter per person per day for 2400 persons from 343 non displaced drought affected families in Kashkar Wasat, Sari Poshta and Qali Fawad villages of Tulak district in Ghore province.

2: Constructed of one deep wells equipped with solar power water pump, 4000 W solar Panel. 8 Batteries,5 Kw Genrator, 12000 Liter elevated reservoir with total production of 36000 liter per day, 15 Tab stand and 1200-1500m Pipe scheme. Each well has the capacity to provide drinking water @ 15 liter per person per day for 2400 persons from 343 non displaced drought affected families in Sarasiab Gula Chushma and Hyderabad villages of Tulak district in Ghore province.

3: Constructed of one deep wells equipped with solar power water pump, 4000 W solar Panel, 8 Batteries,5 Kw Genrator, 12000 Liter elevated reservoir with total production of 36000 liter per day, 15 Tab stand and

1200-1500m Pipe scheme. Each Well has the capacity to provide drinking water @ 15 liter per person per day for 2400 persons from 343 non displaced drought affected families in Takht Qala and Jurak Villages Of Tulak district in Ghore province.

4. Training of 1050 families in hygiene awareness rising. In Kashkar Wasat, Sari Poshta, Qali Fawad Sarasiab Gula Chushma, Hyderabad Takht Qala and Jurak villages of Tulak district in Ghore province.

In total 6 wells equipped with solar and pipe scheme as explained above constructed and 2000 families received hygiene awareness training in Dawlatyar and Tulak districts .

Training of 1050 families in hygiene awareness rising in Tolak

Construction of equipped with solar power water pump, in Tolak

Construction of three deep wells and equipped with solar power water pump, reservoir and Pipe scheme to provide drinking water for 1050 drought affected families in Dawlatyar district of Ghor province.

New Consultancy and Relief Organization

NCRO Annual Report 2019

Planned project duration :	12 Months	Priority:	
Planned Start Date :	01/01/2019	Planned End Date :	31/12/2019
Project Summary :	<p>With 5.5 million people in need, the revised Afghanistan 2018 HRP is now targeting 4.2 million people, an increase of 600,000 people compared to 2017. The rise in number of people in need of humanitarian assistance has mainly been caused by the worst drought in nearly 20 years, affecting more than 2.2 million people and the increasing violence during the run up to the parliamentary elections this October. 2018 has been an increasingly violent year in Afghanistan, killing more than 8,000 people so far (Amnesty International). The (revised) 2018 HRP is budgeting US\$ 547 million, an increase of more than 30% compared to the previous year and continues to be underfunded by 67%. In response to the humanitarian crisis in country, the proposed Afghanistan Joint Response (AFJR) 2019 will target an estimated 59,760 conflict, natural disaster affected and Internally Displaced Persons (IDPs), returning Afghans and their host community during a period of 12 months, starting 1 January, 2019. The five DRA AFJR partners including Cordaid, Oxfam Novib (Oxfam), Stichting Vluchteling (SV-IRC), Terre des Hommes (TdH) and ZOA will continue to provide life-saving and protection assistance, in line with HRP SO1 (save lives in the areas of highest needs) and SO3 (people stuck by sudden onset crises get the help they need, on time) in the sectors of Food Security/ Livelihood, Shelter and WASH. Cash based interventions will be widely used by partners as the main modality to address the immediate needs of newly displaced and returning Afghans. The total budget of the response amounts to EUR 4.31 million and will be implemented in 2 of the most conflict and returnee affected provinces; Kunduz and Nangarhar. More than half of the districts in both provinces are classified as Hard To Reach (HTR). Parts of both provinces are also severely affected by the on-going drought.</p>		

Service Coverage Statistics In Nangarhar Province Given As Below :

Province	Base Population	Number of Returnees	Number of IDPs	Total Inflow returnees and arrival IDPs	% of population
Nangarhar	1,635,872	494,020	300,092	794,112	33%

Achieved goals :

Overall Objective Joint Response The overall objective of the AFJR2019 contributed to the life-saving protection and assistance needs of conflict, natural disaster affected and internally displaced persons, returning Afghans and their host community. In total the response targeted 59,760 individuals (without double counting).

result Area 1: Food Security & Livelihood – in total 13,804 individuals targeted Objective - Ensured continued and regular access to food for conflict, natural disaster affected and IDPs, returning Afghans and their host community.

FSC-R1 – Short-term livelihood support. FSC-I1- Number of people provided with resources to protect and rebuild their livelihood. Target: 8,310 individuals Activities:

1. Distributed of FSAC endorsed livelihood packages, livestock (chickens for home-based poultry farm) and agro input (such as seeds) accompanied with relevant livestock/ agro-training. Women targeted directly by home based poultry farms or specific livelihood activities such as tailoring, Youth I also targeted through the provision of sub-grants, non-formal education and literacy.
2. Apprenticeship and vocational training (such as Carpentry, Metal Work, Motor Mechanic, Bicycle Repairing, Shoes Maker, Vehicle repairs, Battery and Solar Repairing and tailoring/ embroidery) in accordance with National Skills Development Programme (NSDP). Beneficiaries participating in the activities also received a manual for guidance on starting up a small business. In accordance with the curriculum, literacy and non-formal education included as well as specific child protection related activities including psychosocial support and case management. The intervention aimed to prevent, to reduce or eliminate economic and social vulnerabilities for those children worked under unfavourable conditions, prevented Worst Forms of Child Labour (WFCL) by provided them support to get access to formal, informal education and vocational training and/or to fairly paid, skilled labour by provided vocational training (VT). Protection mainstreamed in this intervention targeted the 20,300 children, their families and their host communities that addressed protection issues. Awareness raising activities, case management, Psychosocial Support (PSS) and Child Friendly Spaces were part of the intervention as well.
3. Short term business skills training and distribution of related start-up kits or micro-grants. These short-term training included basic literacy lessons, which were mandatory. Start-up kits also distributed to skilled beneficiaries who were able to work but lack the necessary tools such a mechanics.

Result Area 2: Shelter & NFI – in total 3,458 individuals targeted Objective – Coordinated and timely ES-NFI response to conflict, natural disaster affected and IDPs, returning Afghans and their host community.

SHL-R1 – Individual household shelter SHL-I1- Number of people Would have access to basic, safe and dignified shelter solutions. Target: 3,458 individuals Activities:

New Consultancy and Relief Organization

NCRO Annual Report 2019

1. Distribution of temporary shelter materials or tents to IDPs and returnees living in informal settlements and who have not been allocated land. Shelter cluster standards followed. Shelters could easily be erected and moved;
2. Constructed and or assistance of transitional/ one-room shelter for IDPs and returnees who have been allocated land. The one-room shelter followed the standards of the shelter cluster and the latest model used.
3. Participatory Approach for Safe Shelter Awareness (PASSA) training in how to construct one-room shelter and sanitation facilities also conducted. This way beneficiaries were able to build themselves and gave the materials for the one-room shelter. In the training male and female representative of the beneficiary families included, but also members of the Community Development Committees of the areas where shelters will be constructed.

Result Area 3: WASH in total 27,038 individuals targeted Objective: Ensured timely access to a sufficient quantity of safe drinking water, use of adequate and gender sensitive sanitation, and appropriate means of hygiene practices by conflict, natural disaster affected and IDPs, returning Afghans and their host community. WSH-R1& R5 – Hygiene promotion (access to soap and awareness) WSH-I1 & I5 - Number of people had regular access to soap to meet hygiene needs & Number of people reached with hygiene promotion/awareness raising activities Target: 16,500 individuals received hygiene kits/ soap and 21,932 individuals received hygiene promotion messages .

Activities: Hygiene promotion sessions at individual household level and in schools conducted by hygiene promoters to increase the impact of providing safe water sources, through the provision of soap, and sensitization on improved hygiene practices. Separate sessions for women and girls organized to allow to openly discussed their hygiene needs; Distribution of hygiene kits to individual households and students (schools). Kits were in line with the WASH cluster standards. Special attention paid to the needs of women and girls. GBV awareness raised during hygiene promotion. WSH-R2- Excreta disposal. WSH-I2- Number of people had access to safe, dignified, clean and functional excreta disposal facilities. Target: 10,495 individuals Activities:

1. Demonstration and or construction of HH emergency latrines. These latrines constructed by participating communities and materials are supplied by the AFJR2019 partner. The latrines function as a model for IDPs and returning Afghans and as there were very few in areas with high return or large influx of IDPs, they encouraged people to build their own. Latrine blocks in schools constructed as well to improve health outcomes and to prevent girls from dropping out of school.
2. Construction of latrines complementary to one-room shelter. In line with the shelter guidelines every transitional/ one room shelter constructed with a latrine.
3. Construction of school latrines (male/ female). WSH-R4 – Water supply WSH-I4- Number of people having access to sufficient and safe water for domestic use. Target: 24,760 individuals Activities:
4. Construction of new water sources (boreholes) in communities and schools. Wells constructed with a handpump. Site selection committees established and composed of DoRR, MRRD, district administration office, CDC and WASH engineer. Women consulted during the site selection process;
5. Rehabilitation of existing water sources. Old or broken wells repaired at both community and school level;
6. Construction of water supply schemes;
7. Establishment and training in maintenance of Water Management Committees. These committees established and trained in repair & maintenance, conflict resolution, environmental health and

New Consultancy and Relief Organization

NCRO Annual Report 2019

- committees also provided with a small toolkit to enable them to maintain and repair the well;
8. Training of mechanics in repair and maintenance of wells; Result Area 4: CASH – in total 19,089 individuals targeted Objective – Conflict, natural disaster affected and IDPs, returning Afghans and their host community fallen into acute vulnerability are assisted with cash modality.

CSH-R1- Unconditional Cash Target: 15,512 individuals

CSH-R3- Cash for work Target: 3,577 individuals
